

# FortiConverter™ Service

Migration to FortiGate Made Easy

### **Highlights**

- Automated migration service converts legacy firewalls to FortiGate NGFWs
- Quick and safe conversion with best practices
- Comprehensive policy validation by Fortinet experts
- Summary report and audit documentation for every conversion
- Broad firewalls
  support, including
  from Bluecoat,
  Checkpoint, Ciena
  (Vyatta), Cisco, Cisco
  Meraki, Forcepoint,
  Huawei, Juniper,
  Mikrotik, Palo Alto
  Networks, PFSense,
  SonicWall, Sophos,
  Ubiquiti, WatchGuard,
  and Zyxell

### **Accelerated Transition for Optimal Protection and Performance**

Aging firewalls offer ineffective protection from sophisticated new cyberthreats. Migrating complex legacy firewall configurations to next-generation solutions may seem relatively simple at a high level, but it actually presents risks and challenges.

FortiConverter Service complies best practices to help your transition to the latest FortiOS with confidence. Whether upgrading from a third-party firewall to a new FortiGate Next-Generation Firewalls (NGFW), or trading in your well-used FortiGate for the latest model, FortiConverter makes the migration more reliable and predicable, reducing human errors that occur in manual process, along with timeline and costs. Unlike free migration tools offered by other firewall vendors, FortiConverter Service automates the transition process by using proven conversion methodologies and diligent configuration validation by Fortinet security experts to ensure the least impact to business operations.

Reduces migration complexity

Eliminates common configuration errors

Saves time spent on manual configuration

FortiConverter™ Service Data Sheet

### **FortiOS Everywhere**

#### FortiOS, Fortinet's Advanced Operating System

FortiOS enables the convergence of high performing networking and security across the Fortinet Security Fabric. Because it can be deployed anywhere, it delivers consistent and context-aware security posture across network, endpoint, and multi-cloud environments.

FortiOS powers all FortiGate deployments whether a physical or virtual device, as a container, or as a cloud service. This universal deployment model enables the consolidation of many technologies and use cases into a simplified, single policy and management framework. Its organically built best-of-breed capabilities, unified operating system, and ultra-scalability allows organizations to protect all edges, simplify operations, and run their business without compromising performance or protection.

FortiOS dramatically expands the Fortinet Security Fabric's ability to deliver advanced AI/ ML-powered services, inline advanced sandbox detection, integrated ZTNA enforcement, and more, provides protection across hybrid deployment models for hardware, software, and Software-as-a-Service with SASE.

FortiOS expands visibility and control, ensures the consistent deployment and enforcement of security policies, and enables centralized management across large-scale networks with the following key attributes:

- Interactive drill-down and topology viewers that display real-time status
- On-click remediation that provides accurate and quick protection against threats and abuses
- · Unique threat score system correlates weighted threats with users to prioritize investigations

### **Simplified Migration Experience for Security Reliance**

The FortiConverter service offers options to meet customers' unique needs including a one-time migration service, a migration software tool, or professional services tailored by certified experts.

#### **FortiConverter Service: One-time Migration Service**

The rapid adoption of emerging technologies adds dynamic security challenges for businesses. Cyber criminals continue to outsmart dated firewalls. Fortinet offers FortiConverter Service to help your organizations move to the latest FortiGate NGFW quickly and safely. This migration service add-on is available for FortiGate hardware and virtual appliances.

Fully integrated with the latest FortiOS, FortiConverter Service helps optimize the upgrade experience to a new FortiGate by intelligently identifying and converting configuration files directly within the FortiGate management console.

FortiConverter Service offers an intuitive cloud portal for third-party firewall migration. Simply upload the source configuration files and let FortiConverter does the rest. You also have visibility of service entitlement and status across all FortiGate devices.

FortiConverter Service supports migration of interface NAT, firewall policy and address objects, as well as static routes for third-party vendor configuration to FortiGate configuration. All FortiGate to FortiGate configurations are fully supported.

### **Alternative Migration Services**

#### **FortiConverter Tool: Migration Software Tool**

Organizations having a team with firewall knowledge and planning for multiple migrations over a year have an alternative to purchase this FortiConverter software that allows them to convert and tune their own migration files and options as needed. This migration tool is also ideal for organizations who have sensitive configurations and prefer to handle migration onsite. Available as a yearly subscription, the FortiConverter Tool enables an organization to perform an unlimited number of configuration conversions during the year over the entire FortiConverter library of third-party firewalls, including some fine-tuning options to customize the configuration conversion.

#### **Professional Services: Tailored Migration from Certified Experts**

Organizations may choose Fortinet Professional Services to provide customized consulting services for an end-to-end migration. By engaging the skills and experience of Fortinet Professional Services, organizations can leverage the vast experience and knowledge the Fortinet Professional Services teams provide. Organizations can also request specific optimizations and migration support for their specific organization needs.

Customized services could include these tasks but not limited to:

- Solution design with design guides and best practice
- Project and migration plans
- Migration risk analyses
- · Appliance commissioning
- Policy migration
- Cutover support and troubleshooting
- Test plan execution and validation
- Post-cutover incident management

To engage Fortinet Professional Services for your project, contact your Fortinet partner account manager.
